IT'S TIME TO COMPLETE YOUR TRANSFORMATION.

Forever F.I.T. 2 will use everything you've already learnt but move your body onto the next level. You will increase your muscle-building exercises and fine-tune your nutrition. Follow these tips to achieve your best results:

RECORD YOUR MEASUREMENTS.

Record your measurements in a notebook. Keeping track of your measurements is the best way to measure your success on the **Forever F.I.T. 2** programme.

TRACK YOUR PROGRESS TOWARD YOUR GOALS.

Stay focused on the goals that you set for yourself and strive towards them.

RECORD YOUR CALORIES.

Keeping track of your calorie intake is important to help you look and feel better. Record your calorie intake in your notebook or use a calorie-tracking app like **MyFitnessPal**.

DRINK PLENTY OF WATER.

Approximately three litres a day for men and two - two ½ litres a day for women.

PUT DOWN THE SALTSHAKER.

Salt contributes to fluid retention. Flavour foods with herbs and spices instead.

AVOID FIZZY DRINKS AND CARBONATED BEVERAGES.

Carbonation promotes bloating. Drinking fizzy drinks also adds unwanted calories and sugar.

AND FAT BALANCE THAT YOU
NEED TO BUILD HEALTHY,
LEAN MUSCLE.**

CHALLENGE YOURSELF.

There are many misconceptions about building muscle and how it relates to your nutrition and fitness. Building lean muscle is essential to burning fat. To build and maintain muscle, the body burns more calories, leading to greater fat burn and weight loss. Cardiovascular exercise is important to help burn fat

and support a healthy heart, but should be used in balance with resistance and interval training. It's important to vary your exercise routine to avoid weight loss plateaus.

THERE'S NO TIME LIKE THE PRESENT. CHALLENGE YOURSELF TO DO MORE, WORK HARDER AND GET STRONGER THAN YOU EVER THOUGHT YOU COULD!

FIGHTING PLATEAU.

Have you been sticking to the Forever F.I.T. programme but feel like your weight loss has slowed or even plateaued?

Don't worry, this is nothing that should cause alarm! Plateauing is a relatively common occurrence, but it can easily be overcome with one (or a few) small changes to your routine.

Reaching a plateau can be hard, but you needn't go through it alone. Keep yourself and others motivated by sharing your experience across social media:

TIPS TO HELP YOU STICK TO YOUR PROGRAMME.

Adhering to a strict plan can be one of the greatest contributors to weight loss.

However, social occasions like holidays, celebrations, or dining out, can make sticking to the programme difficult.

There is an easy rule to follow here:

MODERATION

You will undoubtedly be faced with temptation at social gatherings while you're on the Forever F.I.T. programme and after. Plan ahead and eat a healthy snack before you go.

While this may not keep you from having any unhealthy foods while you are there, you will be less likely to over-indulge because you won't be hungry when you arrive.

WHEN EATING OUTSIDE YOUR HOME, TRY TO PICK A RESTAURANT THAT HAS HEALTHY CHOICES ON THE MENU. IF THIS ISN'T POSSIBLE, DON'T BE AFRAID TO ASK FOR SUBSTITUTIONS. MANY RESTAURANTS CAN PREPARE SOMETHING ON THE GRILL THAT WOULD NORMALLY BE COOKED WITH BUTTER OR OTHER SATURATED FATS, OR ARE HAPPY TO REPLACE CARB FILLED SIDES WITH STEAMED VEGETABLES.

SHOPPING HEALTHY.

Sticking to a programme can be hard with engineered foods and hidden ingredients you may not be considering. Even when you think you are following the programme, there may be things in your food preventing you from reaching your greatest success.

BE PREPARED

Follow these tips when planning your lifestyle programme:

Plan out your meals for the week and make a list. People who make lists before grocery shopping are **60-70%** less likely to make impulse purchases.

Eat a snack. Don't go to the store hungry! Grocery shopping while hungry can greatly increase your likelihood of purchasing unhealthy snacks and meals.

Stick to the perimeter of the grocery store. While not everything found here is healthy (hello, bakery!), fruits, vegetables, meats, whole grains, seafood and food largely without preservatives can be found here. This doesn't mean that everything found on the shelves is bad – simply enjoy these foods in greater moderation.

INCREASING YOUR CALORIES.

While it's true that lower calories lead to weight loss, eating too few calories can actually keep you from losing weight. Without the proper fuel, the body can hold onto fat stores in case they are needed. **Forever F.I.T. 2** adjusts your calorie intake to meet the demands of the exercise programme and helps you build muscle.

MIX AND MATCH* THE FOLLOWING RECIPES DURING THE FOREVER F.I.T. PROGRAMME TO MEET YOUR CALORIE REQUIREMENT. YOU CAN DECIDE WHICH MEAL TO MAKE YOUR LARGEST. THE FOREVER F.I.T. PROGRAMME PROVIDES A VARIETY OF OPTIONS TO ADAPT TO YOUR SCHEDULE!

Recommended calories during Forever F.I.T. 2 for men and women.

1,500-1,700 for women

2,000-2,200 for men

Higher protein consumption is necessary for building muscle if you're doing vigorous exercise. Choose your daily calorie requirements within the recommended range, based upon your fitness level and exercise intensity.

BREAKFAST.

Breakfast should be your largest carbohydrate meal of the day. Because you haven't eaten for eight to ten hours, there are fewer carbohydrates stored in your muscles. When you eat carbohydrates during your first meal of the day, they are more likely to be converted into energy instead of affecting fat stores in the body, giving you the boost you need for a great workout.

Calories in the **Forever F.I.T.** programme may vary slightly depending on the brand of ingredients that you use. For exact calories in each brand you're using, consult a calorie-tracking app like **MyFitnessPal**.

THE IMPORTANCE OF HEART RATE

Monitoring your heart rate while you're exercising can help you determine if you're doing too much or not enough. A heart rate monitor will automatically monitor your heart rate, or can determine it yourself with the following calculations:

- + FOR THE F.I.T. PROGRAMME, CALCULATE YOUR TARGET HEART RATE BY SUBTRACTING YOUR AGE FROM 180. FOR EXAMPLE, A 40 YEAR OLD'S TARGET HEART RATE WOULD BE 140 ($180-40=140$).
- + TAKE YOUR PULSE ON THE INSIDE OF YOUR WRIST OR ON THE SIDE OF YOUR NECK DURING EXERCISE.
- + COUNT YOUR PULSE FOR 10 SECONDS AND MULTIPLY BY SIX TO FIND YOUR BEATS PER MINUTE. THIS IS HOW YOU CALCULATE YOUR HEART RATE DURING EXERCISE.

NOW YOU'RE
READY TO GO
THROUGH YOUR
EXERCISES.

Use your target heart rate and your calculated heart rate during exercise to determine the correct intensity for your cardio exercise.

Simply multiply your target heart rate by the percent listed in the exercise plan and compare to your heart rate during exercise. Increase or decrease intensity as needed.

THE FOREVER FIT. 2 FITNESS PLAN REQUIRES DUMBBELLS OR RESISTANCE BANDS. WHERE DUMBBELLS OR RESISTANCE BANDS ARE NEEDED YOU WILL SEE (🏋️) IN THE FITNESS PLAN. OTHER EXERCISES MAY BE MODIFIED BY ADDING RESISTANCE AS YOU BUILD STRENGTH TO HELP INCREASE LEAN MUSCLE MASS AND BURN FAT.
